# Principles & Practices of Open Research

An online module for undergraduate and Masters students

Getting Started with Open Research

E

Getting Started with Open Research: One Step at a Time

Learn More: Additional Resources

Getting Started with Open Research

If you want to learn more about how to do open research you can take our follow-on modules

Research Integrity **1**	Pre-registration **2**	Research Data Management **3**
Reproducible Practices **4**	Open Reporting **5**	Knowledge Dissemination **6**

These will walk you through the steps of how to use each of these open research practices

PAPORTRAIL

Getting Started with Open Research: Additional Modules

Research Integrity — 1

Pre-registration — 2

Research Data Management — 3

Reproducible Practices — 4

Open Reporting — 5

Knowledge Dissemination

You can take the modules individually to get a sense of different aspects
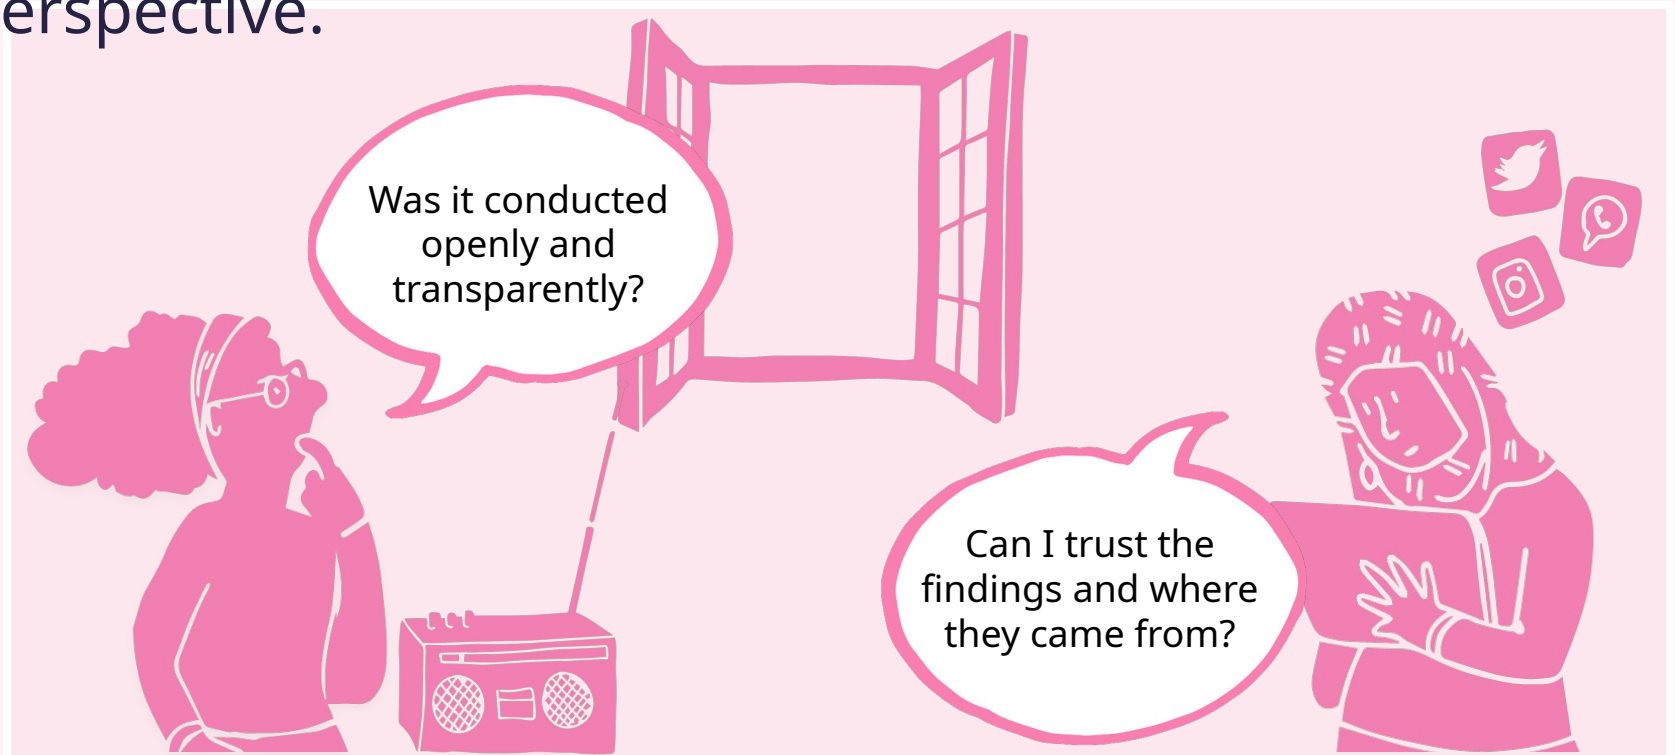

Or all together to get a full understanding of how to use open research practices
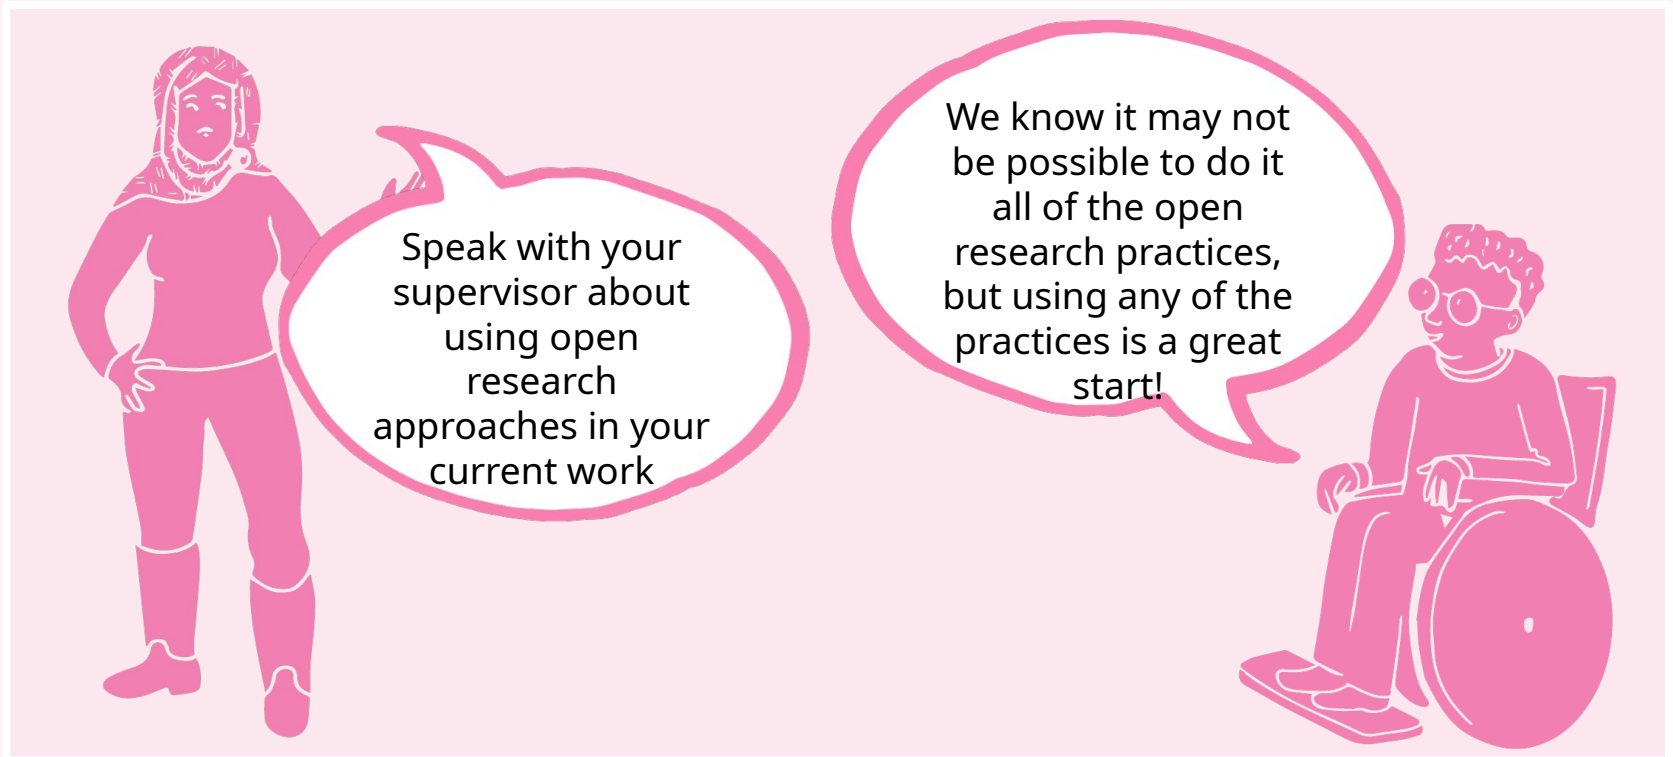

Use What You Have Learned

Start using what you have learned by evaluating the research you encounter every day from an open research perspective.
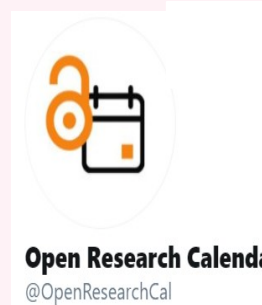

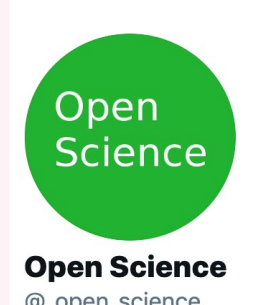

Use What You Have Learned

Start using open research principles and practices in the research you are conducting or will conduct

Getting **Started** with Open Research: Additional Modules

Don't forget that you can take any/all of our follow-on modules to learn more about how to **do** open research

Research Integrity

1

Pre-registration

2

Research Data Management

3

Reproducible Practices

4

Open Reporting

5

Knowledge Dissemination

6

Activity

Read the open research article on Canvas and reflect on the open research practices used, and how you could include these in a research project
